responsible for the Safety Data Sheet	info@comec-italia.it	
Product distribution by:	Edgardo Baggini	
1.4. Emergency telephone number For urgent inquiries refer to	CENTRO ANTIVELENI OSPEDALE NIGUARDA MILANO	Tel. 02/66101029 (24/24h) -
	CENTRO ANTIVELENI POLICLINICO A.GEMELL ROMA	

# **SECTION 2. Hazards identification**

#### 2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of EC Regulation 1907/2006 and subsequent amendments. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

	226
Aspiration hazard, category 1 H3	304
Specific target organ toxicity - single exposure, category 3 H3	335
Specific target organ toxicity - single exposure, category 3 H3	336
Hazardous to the aquatic environment, chronic toxicity, H4 category 2	111

Flammable liquid and vapour. May be fatal if swallowed and enters airways. May cause respiratory irritation. May cause drowsiness or dizziness. Toxic to aquatic life with long lasting effects.

#### 2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words:	Danger	
lazard statements:		
H226 H304	Flammable liquid and vapour. May be fatal if swallowed and enters airways.	
H335	May cause respiratory irritation.	
H336 H411	May cause drowsiness or dizziness. Toxic to aquatic life with long lasting effects.	
EUH066	Repeated exposure may cause skin dryness o	r cracking.
Precautionary stateme	ents:	
P210	Keep away from heat, hot surfaces, sparks, op	en flames and other ignition sources. No smoking.
P261 P280	Avoid breathing dust, gas or vapours.	
P301+P310	Wear protective gloves / eye protection / face IF SWALLOWED: Immediately call a POISON	CENTER.
P331 P370+P378	Do NOT induce vomiting. In case of fire: use chemical powder, CO2 or d	in send to extinguish
Contains:	SOLVENT NAPHTHA (PETROLEUM), LIGHT	AROM
2.3. Other hazards		
On the basis of availat	ble data, the product does not contain any PBT or vPv	/B in percentage greater than 0,1%.

SECTION 4. First aid measures			
4.1. Description of first aid measures			
EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, seek medical advice. SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attent before using it again. NHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medic NGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything	tion immediately. Wash contaminated clothing cal advice/attention immediately.		
4.2. Most important symptoms and effects, both acute and delayed			
Specific information on symptoms and effects caused by the product are unknown.			
4.3. Indication of any immediate medical attention and special treatment needed			
nformation not available			
nformation not available SECTION 5. Firefighting measures			
SECTION 5. Firefighting measures 5.1. Extinguishing media SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water s UNSUITABLE EXTINGUISHING EQUIPMENT	spray.		
SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water s JNSUITABLE EXTINGUISHING EQUIPMENT	spray.		
SECTION 5. Firefighting measures 5.1. Extinguishing media SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water s UNSUITABLE EXTINGUISHING EQUIPMENT None in particular. 5.2. Special hazards arising from the substance or mixture HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE	spray.

lormal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A pen circuit positive pressure compressed air breathing apparatus (BS EN 137).	29 and A30) in combination with self-containe
SECTION 6. Accidental release measures	
6.1. Personal precautions, protective equipment and emergency procedures	
Block the leakage if there is no hazard. Vear suitable protective equipment (including personal protective equipment referred to under Secti contamination of skin, eyes and personal clothing. These indications apply for both processing staff and th	
Send away individuals who are not suitably equipped. Eliminate all sources of ignition (cigarettes, flames,	sparks, etc.) from the leakage site.
6.2. Environmental precautions	
The product must not penetrate into the sewer system or come into contact with surface water or ground v	water.
6.3. Methods and material for containment and cleaning up	
Collect the leaked product into a suitable container. If the product is flammable, use explosion-proc container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with	
6.4. Reference to other sections	
my information on personal protection and disposal is given in sections 8 and 13.	

# **SECTION 7. Handling and storage**

## 7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. In order to avoid the risk of fires and explosions, never use compressed air when handling. Open containers with caution as they may be pressurised.

## 7.2. Conditions for safe storage, including any incompatibilities

COMEC ITALIA SRL	Revision nr. 11
	Dated 25/05/2017
PLOO	Printed on 05/06/2017
	Page n. 5/12

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

Store in a well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition.

## 7.3. Specific end use(s)

Information not available

## **SECTION 8. Exposure controls/personal protection**

#### 8.1. Control parameters

#### SOLVENT NAPHTHA (PETROLEUM), LIGHT AROM Health - Derived no-effect level - DNEL / DMEL

VND = hazard identified but	no DNEL/PNEC a	vailable ; NEA	= no exposure	expected ;	NPI = no hazar	d identified.		
	Effects on consumers				Effects on workers			
Route of exposure	Acute local	Acute systemic	Chronic local	Chronic systemic	Acute local	Acute systemic	Chronic local	Chronic systemic
Oral			VND	11 mg/kg				
Inhalation			VND	32 mg/m3			VND	150 mg/m3
Skin			VND	11 mg/kg			VND	25 mg/kg

#### 8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

#### HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

#### SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion.

#### EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

## RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type A filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with

COMEC ITALIA SRL	Revision nr. 11
	Dated 25/05/2017
PLOO	Printed on 05/06/2017
	Page n. 6/12

standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

#### ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

# **SECTION 9.** Physical and chemical properties

## 9.1. Information on basic physical and chemical properties

## 9.2. Other information

Information not available

## **SECTION 10. Stability and reactivity**

10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

10.2. Chemical stability

The product is stable in normal conditions of use and storage.

COMEC ITALIA SRL	Revision nr. 11
	Dated 25/05/2017
	Dated 25/05/2017
	Printed on 05/06/2017

	Page n. 7/12

#### 10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

#### 10.4. Conditions to avoid

None in particular. However the usual precautions used for chemical products should be respected.

10.5. Incompatible materials

Information not available

10.6. Hazardous decomposition products

Information not available

## **SECTION 11. Toxicological information**

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

#### 11.1. Information on toxicological effects

Metabolism, toxicokinetics, mechanism of action and other information Information not available Information on likely routes of exposure Information not available Delayed and immediate effects as well as chronic effects from short and long-term exposure Information not available Interactive effects Information not available ACUTE TOXICITY LC50 (Inhalation) of the mixture:Not classified (no significant component) LD50 (Oral) of the mixture:Not classified (no significant component) LD50 (Dermal) of the mixture:Not classified (no significant component) SOLVENT NAPHTHA (PETROLEUM), LIGHT AROM > 2000 mg/kg LD50 (Oral) > 2000 mg/kg LD50 (Dermal) > 5 mg/lLC50 (Inhalation)

#### 12.6. Other adverse effects

Information not available

## **SECTION 13.** Disposal considerations

#### 13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions. CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

Product Point

3 - 40

Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage greater than 0,1%.

Substances subject to authorisarion (Annex XIV REACH)

None

Substances subject to exportation reporting pursuant to (EC) Reg. 649/2012:

COMEC ITALIA	SRL
--------------	-----

Revision nr. 11

Dated 25/05/2017 Printed on 05/06/2017

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

Healthcare controls

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

## 15.2. Chemical safety assessment

No chemical safety assessment has been processed for the mixture and the substances it contains.

# **SECTION 16. Other information**

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Flam. Liq. 3	Flammable liquid, category 3
Asp. Tox. 1	Aspiration hazard, category 1
STOT SE 3	Specific target organ toxicity - single exposure, category 3
Aquatic Chronic 2	Hazardous to the aquatic environment, chronic toxicity, category 2
H226	Flammable liquid and vapour.
H304	May be fatal if swallowed and enters airways.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H411	Toxic to aquatic life with long lasting effects.
EUH066	Repeated exposure may cause skin dryness or cracking.

LEGEND:

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- CAS NUMBER: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE NUMBER: Identifier in ESIS (European archive of existing substances)
- CLP: EC Regulation 1272/2008
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization
- INDEX NUMBER: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational Exposure Level
- PBT: Persistent bioaccumulative and toxic as REACH Regulation
- PEC: Predicted environmental Concentration
- PEL: Predicted exposure level

COMEC ITALIA SRL	Revision nr. 11 Dated 25/05/2017	
DI OO	Printed on 05/06/2017	
PLOO	Page n. 12/12	
PNEC: Predicted no effect concentration		
REACH: EC Regulation 1907/2006		
RID: Regulation concerning the international transport of dangerous goods by train TLV: Threshold Limit Value		
TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.		
TWA STEL: Short-term exposure limit TWA: Time-weighted average exposure limit		
VOC: Volatile organic Compounds		
vPvB: Very Persistent and very Bioaccumulative as for REACH Regulation WGK: Water hazard classes (German).
