ABOUT ME

I am an enthusiastic and hardworking aeronautical engineering student with leadership experience in university projects. I thrive in team environments, solving complex challenges and exploring innovative solutions, including clean energy generation. With a strong technical and business background, I am eager to learn and contribute to aerospace advancements.

RELEVANT SKILLS

- Facilities in communication
- Fluency in English and Spanish
- Committed with his work
- Leadership
- Constantly improving.

WORK EXPERIENCE

- Currently executing an extracurricular engineering role at Aquilo Rocket Group
- Project manager and creator of a student project developing, designing and manufacturing a wind turbine project for clean energy.
- ASA Campus, working in customer service at Open days for Inholland

EDUCATION

- Complete an International Baccalaureate (IB) of sciences diploma having taken courses such as business management, advanced English, Math analysis and approaches and physics.
- I've done research in an extended essay in physics about the efficiency of a motor in different densities.
- English C1 at IELTS
- Spanish native language
- CAS social work around 100 hours with a blog of experience
- Current education at Inholland, Aeronautical Engineering 2024/2025

CERTIFICATIONS

Sciences

Diploma in science fair by having the best extended essay about a motor efficiency.

Sports

Regional selected professional table tennis player Peru
